

NIK NUR LIYANA

Network Security Student | Seeking Internship Opportunities

+60 14 916 2902
nikyana69@gmail.com
Sungai Petani, Kedah

CAREER OBJECTIVE

Motivated final-year Cybersecurity student at University Sultan Zainal Abidin seeking an internship opportunity to apply practical knowledge in network security, digital forensics, penetration testing, and IoT systems. Experienced in developing security-focused applications and conducting hands-on cybersecurity laboratories using industry-standard tools. Passionate about protecting digital assets, solving security challenges, and continuously expanding technical expertise in cybersecurity and information security domains.

EDUCATION

- | | |
|---------------------|--|
| Graduated July 2019 | Bachelor of Computer Network Security, Universiti Sultan Zainal Abidin – Besut, Terengganu <ul style="list-style-type: none">• Grade: 3.75 |
| Graduated May 2022 | Kolej Matrikulasi Kedah – Changlun, Kedah <ul style="list-style-type: none">• Grade: 3.83 |

WORK EXPERIENCES

- | | |
|-----------------------|---|
| July – September 2024 | <u>Production Operator, Jabil</u> – Sungai Petani, Kedah <ul style="list-style-type: none">• Operated manufacturing equipment while following standard operating procedures and safety requirements.• Performed quality inspection to ensure products met production standards. |
| 2023 - 2024 | Quran Tutor, Kelas Quran Online <ul style="list-style-type: none">• Guided students in Quran recitation and Tajweed through personalized learning sessions.• Developed communication and teaching skills while adapting lessons to students' abilities. |

ACADEMIC PROJECT AND LABORATORY EXPERIENCE

Smart Door Lock System Using Face Recognition and TOTP Authentication (Final Year Project)

Technologies: Python, Flask, OpenCV, SQLite, PyOTP, ESP32-CAM, Arduino IDE

- Developed an IoT-based smart door lock system integrating face recognition and Time-Based One-Time Password (TOTP) authentication.
- Implemented Local Binary Pattern Histogram (LBPH) algorithm for facial recognition and integrated Google Authenticator for remote access verification.
- Established communication between the web application and ESP32-CAM to control door access.
- Designed a web interface and centralized database for user management and access logging.

Digital Forensic Investigation Project

Tools: Autopsy, Volatility Framework, Wireshark, Kali Linux

- Performed disk, memory, and network forensic analysis using various forensic tools.
- Investigated system artifacts and network traffic as part of a digital forensics assignment.
- Documented findings and investigation results in a structured report.

Web Security Testing Laboratory

Tools: Kali Linux, Burp Suite, WebGoat, OWASP Juice Shop, Metasploit

- Performed vulnerability assessment and web security testing exercises in controlled environments.

- Conducted SQL injection and authentication-related security exercises.
- Utilized Burp Suite and Metasploit for traffic analysis and attack simulations.
- Strengthened understanding of web security concepts and common vulnerabilities.

Network Security and Traffic Analysis Laboratory

Tools: Wireshark, Cisco Packet Tracer

- Performed packet analysis and network traffic monitoring using Wireshark.
- Configured routing protocols, ACLs, and network services in Cisco Packet Tracer.
- Analyzed network behavior and applied networking concepts through practical laboratory exercises.

CERTIFICATION AND EXTRACURRICULAR ACTIVITIES

Cisco Certified Network Associate (CCNA)

Cisco Networking Academy

- Completed networking and cybersecurity training covering routing, switching, IP addressing, and network fundamentals.
- Developed practical knowledge of network configuration and troubleshooting.

SMART NETWORK BOOTCAMP

Forziq Sdn. Bhd.

- Participated in a network bootcamp focusing on networking fundamentals and network simulation concepts.
- Gained hands-on exposure to network design and analysis using NS-3.

Member, RoboPro Club

Universiti Sultan Zainal Abidin (UniSZA)

- Conducted IoT and embedded systems workshops for secondary school students.
- Introduced Arduino and sensor-based technologies through hands-on learning activities.
- Promoted STEM education and technological awareness among younger students.

TECHNICAL SKILLS

Programming Languages

- JavaScript
- Python

Development Tools

- Visual Studio Code
- Arduino IDE
- VirtualBox

Cybersecurity Tools

- Kali Linux
- Wireshark
- Burp Suite
- Metasploit
- Volatility
- Autopsy

Networking

- TCP/IP
- Routing
- Access Control Lists
- DHCP
- Network Fundamentals

SOFT SKILLS

- Communication skills
- Teamwork and collaboration
- Problem-solving
- Time management
- Adaptability
- Continuous learning

LANGUAGES

- Malay – Native proficiency
- English – Basic working proficiency
